Activities within this program present the potential for students to sustain physical injury. The following procedures will be implemented – along with other strategies – to manage the potential risks in the program.

Children will be briefed at the beginning of the activity and will be made aware of their responsibilities when engaged in activities. They will know the safety procedures that should be taken. These procedures fall into two main categories: factors relating to one's own safety, factors relating to the safety of others. Correct staff ratio will be maintained. All staff are aware of and will follow the Safety Guidelines.

A risk management plan for this program has been developed by staff and is available for parents to review on request.
